JOINto and JOINtoGO are mentioned in the article via the link below:

<https://irishtechnews.ie/interview-with-paul-mears-token-investor/>

We have initiated a new interview round of upcoming users focusing on JOINto products. We are looking for the final input and feedback from our end-users in order to meet user requirements and gain the best possible offset for success.

COUNTDOWN

We are now entering the final development phase of our applications and we promise you that the designs we have and the usability of the applications are simple, smart and awesome.

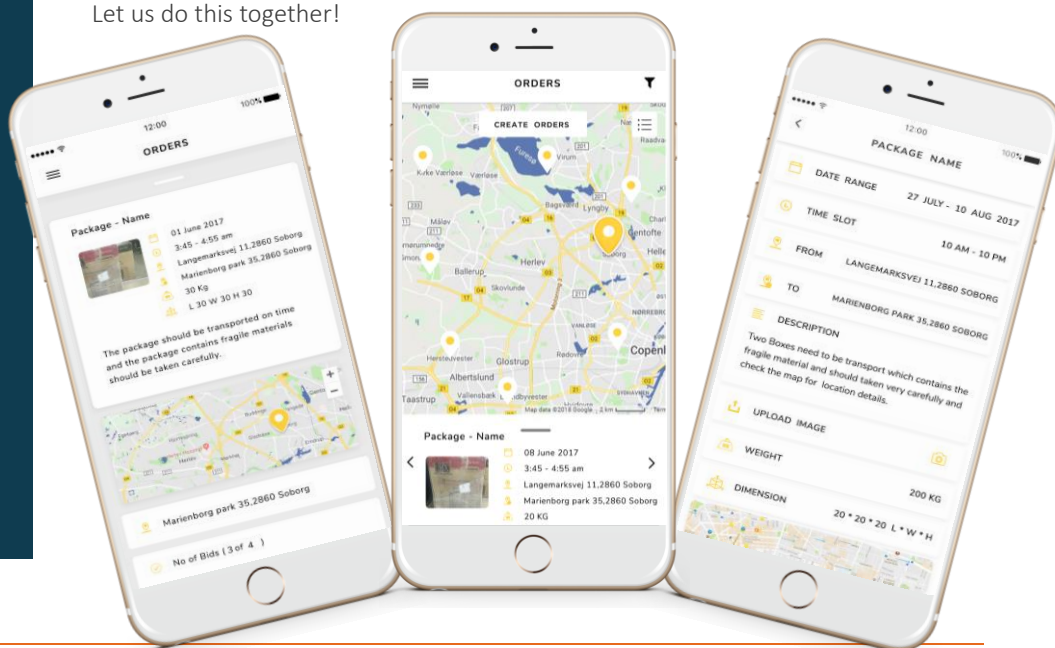

The applications will be developed in a sequence EDUCATE, TRANSPORT and GO; Sate Development are doing their outmost to produce high quality products for you and us to be proud of.

After these, we do have exciting additions to the JOINto family of applications coming up, let us mention briefly, DINE and MATCH.

WE NEED YOUR SHOUT OUT

As we are entering a period where we need to increase awareness of JOINto and build momentum before product launch and ITO launch, we need to have you all to engage your network by sharing and commenting our posts on social medias.

Let us do this together!

JOINto is an extraordinary concept where one can add anything behind JOINto. I believe that they have really found excellent products and their solutions will definitely benefit many people and be an attractive asset for companies to be part of.
